-  BESTPEX STICKS
-  BESTPEX COILS
-  RADIANT HEAT PEX
-  FLAIR-IT CORRUGATED PIPE
-  POLYETHYLENE PIPE
- 
- 
- 

PEX is a polymer pipe constructed of cross-linked polyethylene. It is an alternative to copper plumbing pipe because of the lower cost, faster installation and more flexible properties. There are three types of PEX available through Flair-It: PEX-a (SafePEX), PEX-b (BestPEX) and radiant heat PEX, which is PEX-b with an oxygen barrier. All PEX distributed by Flair-It meets the requirements of ASTM F 876 and F 877. 3/8" - 1" ID PEX is available in straight sticks from 5' to 20' and coils from 100' to 1000' in bulk and barcoded.

Flair-It fittings are constructed of durable Polyoxymethylene (POM) and are compatible with PEX and PB. The patented design consists of a nut and flared insert and requires no tools. The fittings push against the ID and OD of the pipe, creating a strong long-term seal. Flair-It fittings are available in 3/8" - 3/4" and are stocked in bulk and barcoded versions. Must be ordered in lots of ten. Starter kits are also available. Valves are directional.

WATER MANAGEMENT PANELS

WATER MANAGEMENT PANELS: Flair-It has created a series of Water Management Panels, that when installed in an RV or Boat distributes water to the proper fixture, and accomplishes a series of tasks that are integral to the operation of the RV or Boat. WMP's offer the consumer a simple device that performs servicing functions needed to maintain an RV or Boat. The Water Management Panels will allow the RV/Boat owner to simply turn a series of valves, changing from pump to city fill, by-passing the water heater, winterizing the RV/Boat, and at the same time, managing the entire units water systems - all in a small lightweight panel. These WMP's are manufactured with Flair-It fittings, white laminate, color coded valve handles and easy to read instruction labels. The small design allows the RV/Boat builder to incorporate the WMP into the vehicle's storage compartments, allowing for easy access and bringing value to the end user.

WMP-1

PART # 41358

7" X 11" PANEL FOR PUMP / CITY PRESSURE, TANK FILL, WINTERIZE

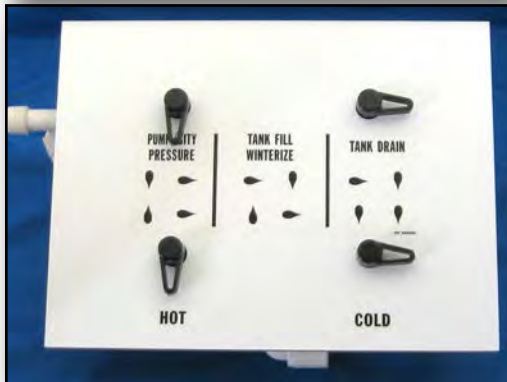

WMP-2

PART # 41359

8 1/2" X 11" PANEL FOR PUMP / CITY PRESSURE, TANK FILL, TANK DRAIN, WINTERIZE

WMP-3

PART # 41360

8 1/2" X 11" PANEL FOR PUMP / CITY PRESSURE, TANK FILL / WINTERIZE, TANK DRAIN

WMP-4

PART # 41361

7" X 11" PANEL FOR PUMP / CITY FILL, TANK FILL, WINTERIZE, WATER HEATER BYPASS

Flair-It PRO PEX fittings meet IAPMO, cNSF, g and CSA specifications and are ideal for both professional installation and do-it-yourself plumbing repair. Flair-It PRO PEX fittings require Flair-It PRO tools, which are affordable and compact for easy use in tight spaces. The Flair-It PRO PEX system is compatible with any brand or type of SDR-9 PEX tubing. It is approved for behind the wall and in concealed areas. Flair-It PRO fittings may be used with rings or nuts. Flair-It PRO fittings are available in bulk. Display/Starter kits are available.

FLAIR-IT PLUS MANIFOLDS

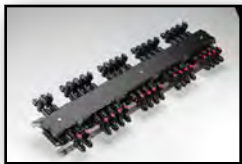

Flair It Plus manifolds are constructed of durable Udel Polysulfone (PLS). The modular manifold assembly is customizable and easy to use. Standard 1/2" male threaded outlets make the Flair-It Plus manifolds versatile. Flair It Plus manifolds meet IAPMO cNSFg standards. The manifolds are available in 8 - 36 ports.

PROBite Push Connect Fittings & Valves are brass push-on fittings that connect copper, PEX, CPVC and stainless steel plumbing pipe; available in both low-lead and lead-free versions. PROBite is removable and reusable with full, unrestricted flow. 1/4" - 2" PROBite fittings are available in bulk and individually barcoded bags with inserts. Starter kits are also available. PROBite fittings meet IAPMO, UPC, IPC, ASSE 1061, NSFg 61 and cUPC standards. PEX inserts must be used when connecting PEX pipe. PROBite lead-free meets Annex-G, California AB-1953 and Vermont lead-free requirements.

ECOPOLY PLS INSERT PEX FITTINGS

**New PEX to Garden
Hose**

**New PEX to
Copper Flex**

Flair-It Ecopoly polysulfone insert PEX fittings are constructed of durable Udel Polysulfone (PSU). PSU is a cost effective alternative to brass. These fittings meet the requirements of ASTM F 2159, cNSFg and are compatible with copper crimp rings, and stainless steel rings. Ecopoly PLS insert fittings are available in bulk and barcoded bags of ten.

Flair-It Ecopoly Water Heater Flex Connector Fitting 28872 and 29872 work on Water Heater Flex Connectors that have 3/4" FPT Swivel Connectors with BSP Parallel Threads

Flair-It offers a variety of methods for crimping PEX fittings. Copper rings and stainless steel clamps (SSCs) are available for both PEX and polybutylene (PB). The copper rings are annealed copper and color coded for easy identification - black for PEX and copper for PB. Oetiker and Murray SSCs are constructed of stainless steel and meet ASTM F 1807 (metal fittings) and F 2098 and F 2159 (plastic fittings). Murray SSCs are ideal for cold weather installations and offer a thicker band for additional tension. Our copper rings and SSCs meet ASTM F 1807 (metal fittings) and F 2159 (plastic fittings). Our copper PB rings meet ASTM F 1380.

Connecting Solutions for PEX Plumbing Applications

Efficient. Reliable. Secure.

Connections for PEX plumbing systems

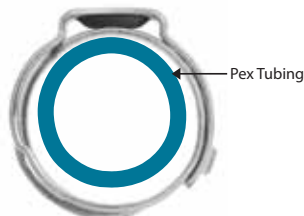

For nearly 70 years, Oetiker high-tech hose and tubing connections have been used throughout the industry. Oetiker clamps are currently being used on Polyethylene cross-linked tubing applications by the PEX Plumbing Industry. The specified clamps are suitable for fast and secure connections of PEX tubing in the plumbing field. The clamp design ensures tamper detection. The clamp sizes are solely intended for PEX applications with corresponding inch sizes. The robust interlock design, specifically developed for PEX applications leads to even higher radial loads of the clamp.

Oetiker Connecting Solutions offer these unique special advantages:

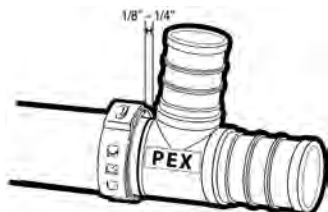

Standard PEX

- + 360° Stepless design
- + PG 167 PEX conforms to ASTM F877/F2098
- + Narrow band for concentrated seal compression
- + Requires only one installation tool
- + Fast, simple and secure installation
- + Tamper-detectable design

Installation of Oetiker Sealing Solutions for PEX Systems

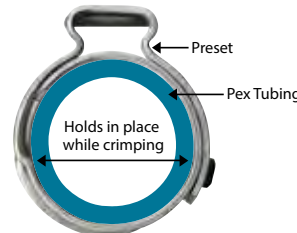

The recommended distance (dimension) between the "Clamp" and "End of the Tube" is 1/8" - 1/4".

For proper installation of clamps, please use an Oetiker recommended installation tool.

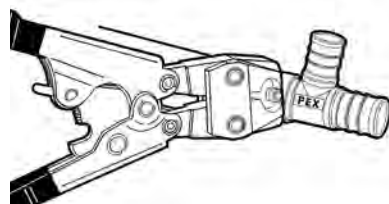

New PEXGrip Technology*

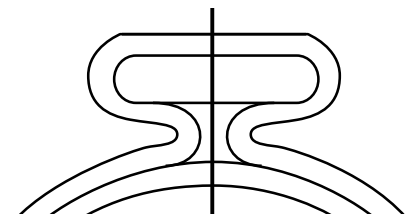

- + Preset to prevent clamp from slipping
- + Grips tube for easy installation
- + 360° Stepless design
- + PG 167 PEX conforms to ASTM F877/F2098
- + Narrow band for concentrated seal compression
- + Requires only one installation tool
- + Fast, simple and secure installation
- + Tamper-detectable design

Patent Pending

Slip clamp over tubing and then close clamp ear with tool, tool will not release until clamp is fully closed.

Visually inspect clamp for correct closed ear form.
